## BIOGRAPHY

Born from an unethical military experiment to mutate unborn fetuses, the Doctor in charge of the investigation swapped Samantha for the dead baby of the Wilkins' family, claiming to his superiors the baby was born dead.

From early age, Sam had an uncanny knowledge of the composition of matter, and displayed the ability to alter it to her will. She had a short run as a solo pre-teen hero, gaining a few adversaries like the villain Killcannon. At age 13 she was recruited by Robot into the Teen Team.

4 years later, she attends Reginal Vel Johnson High School and is in a relationship with Rex Splode.

## DISTINCTIONS:

*Stunning Redhead:* Samantha is a gorgeous red-haired teenager, the focus of every male eyes and the heroine of many, many young girls. Truth is she actually doesn't care much about her looks, and she can't afford to be distracted while battling out cosmic menaces.

*I love Rex:* Rex Splode is Sam's first love and first everything since they met

years ago. She has a typical 19-year-old infatuation for the boy, capable of inspiration or outrage.

*I've been doing this for a while, y'know?* Atom Eve has been a superhero since she used her powers to free captive puppies at age 13. She is brave, collected and trained at this job; she realizes it is important and is in it to actually help, not flaunt her abilities.

## POWERS AND ABILITIES:

Doctor Brandyworth's only success history, Sam's DNA was altered to make use of Smart Atoms. Her control is practically limitless, but not constrained to her own body like Viltrumites. Instead, Atom Eve can alter atoms all around her to her will. Sam can reconfigure matter at the smallest level and reconfigure it nearly instantly, even into such complex structures as trees. She has also learnt to affect air around her to project force barriers and a platform allowing her to fly.

Her inability to affect her own body like Viltrumites unconsciously do can perhaps be explained by the "failsafe" presumably installed on her by Brandyworth: Atom Eve cannot affect living animal matter with her powers.
